

Project Design Phase-II

Data Flow Diagram & User Stories

Date	01 July 2026
Team ID	
Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	4 Marks

Data Flow Diagrams: A Data Flow Diagram (DFD) is a traditional visual representation of

Flow

the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: (Simplified)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Public User)	Dashboard Access	USN-1	As a user, I can view the interactive dashboard without logging in.	Dashboard loads successfully in browser	High	Sprint1
Customer (Public User)	Data Filtering	USN-2	As a user, I can filter agricultural data by State, Crop, and Season.	Charts update dynamically based on filters	High	Sprint1
Customer (Public User)	Geographic View	USN-3	As a user, I can interact with the India map to see state-wise production .	Tooltip shows exact production for the hovered state	High	Sprint-1
Administrator	Data Update	USN-4	As an admin, I can update the static dataset via Tableau Public.	New data reflects on the web app automatically	Medium	Sprint2
