

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	30 June 2026
Team ID	
Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Agricultural Crop Production Analysis using Tableau

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

 10 minutes to prepare
 1 hour to collaborate
 2 Team Members

 **Before you collaborate**

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

 10 minutes

A Team gathering
Define project roles and discuss project objectives.

Team Members

- Member 1 – Data Collection & Cleaning
- Member 2 – Dashboard Development & Documentation

B Set the goal
Develop an interactive Tableau dashboard that analyzes 25 years (1997–2021) of agricultural crop production data to identify production trends, crop performance, state-wise distribution, and yield insights to support government policy and research.

C Prepare resources
Before brainstorming, collect:

- Agricultural Crop Production Dataset (1997–2021)
- Tableau Public
- Microsoft Excel
- GitHub Repository
- Internship Documentation
- Previous Research Articles (optional)

[Open dataset overview](#) →

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

 5 minutes

PROBLEM

How might we analyze 25 years of agricultural crop production data to help policymakers, researchers, and farmers make data-driven decisions for subsidy allocation, crop planning, and yield improvement?

**Key rules of brainstorming**
To run an effective and productive session

-  Stay in topic.
-  Encourage wild ideas.
-  Defer judgment.
-  Listen to others.
-  Go for volume.
-  If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

Mohammad Shafiya Begum

TIP

You can select a sticky note when the post is unfocused which later you can develop.

KPI Dashboard	State-wise Production Map	Interactive Dashboard Design	Filters for State, Crop, Year	Season-wise Crop Analysis	Cultivated Area Comparison	Subsidy Allocation Support	Policy Decision Support	Mobile View Dashboard
Crop-wise Yield Analysis	Year-wise Production Trend	Mobile View Dashboard	Download Reports	Top Crops Ranking	Cultivated Area Production Analysis	Cost vs Production Analysis	Yield Improvement Insights	User-friendly Filters
Data Cleaning & Validation	Handling Missing Values	Story (Insights Narrative)	User-friendly Visuals	Production Distribution (By Unit)	Export/import of Crops	Rainfall vs Production Correlation	Cost vs Production Correlation	Insights vs Production
								Color-coded Insights
								Shareable Dashboard
								Automated Data Refresh

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and split it up into smaller sub-groups.

20 minutes

TIP

Add actionable tags to sticky notes to make it easier to find, review, organize, and make progress—especially ideas or themes within your must.
